# Quare

Your personal health assistant

The problem

Managing health can often be overwhelming and time-consuming.

- **Understanding Symptoms:** It can be difficult to interpret what symptoms mean and decide when to seek medical help.

- **Finding the Right Doctor:** Searching for a specialist nearby who fits your needs can be a frustrating and time-intensive process.

Our Solution

Providing Symptom Analysis:
Offering insights into potential health issues based on user-provided symptoms.

Doctor Recommendations:
Connecting users with the right healthcare providers near their location.

Health Summary PDFs:
Creating a downloadable and shareable document that summarizes the health analysis and recommendations for streamlined care.

Tech Stack

Frontend: React.JS, Less.js

Backend: Django Rest Framework

Web scraping: Selenium

Dl: Tensorflow
